

# Complete Cloud Security

SSPM | CNAPP | CSPM | CIEM | CWPP | ADPM | KSPM | Compliance

Secure your entire cloud (SaaS, IaaS, & PaaS)

## Total Cloud Protection

Experience security across your entire cloud spectrum - from identity security (human/non-human), misconfiguration detection, workload/runtime protection, continuous compliance, vulnerability mapping, & more!

We've partnered with CheckRed to ensure security over all your SaaS apps and cloud infrastructure.

## Dynamic Offerings

### Wide coverage (SaaS, IaaS, PaaS)

- 2,000+ policies monitoring SaaS, Cloud & Active Directory threats
- Supports custom or in-house apps

### Misconfiguration detection

- Adhere to industry best practices
- Pre-built policies are strategically mapped to compliance frameworks

### Complete visibility

- 100% visibility to all technology in your environment
- Prioritize risks in real-time

### Privilege & access management

- CIEM aligns with principle of least privilege
- Offers visibility to all identities & entitlements
- Facilitates granular access control & privilege management

## Capabilities

### Monitor all SaaS & cloud solutions

- One platform  
SSPM + CSPM + CIEM + CWPP + CNAPP + ADPM + KSPM + Compliance

### Continuous compliance

- CIS, HIPAA, PCI-DSS, NIST, ISO 27001, GDPR, CCM, FedRAMP, CSF 2.0 & more
- Ensures security measures aligned with regulatory requirements

### Third-party app management

- Complete visibility and risk analytics

### Reporting

- PDF, CSV, Word and supports 3rd party BI

### Customization

- Custom dashboards, rules, apps, compliance frameworks, reporting, etc.
